

Emily Walsh Ph.D. began her career at the bench, receiving her doctorate in genetics at UCSF through support of a Howard Hughes Medical Institute fellowship. After a postdoctoral fellowship in human genetics with Eric Lander at the Broad Institute, she transitioned into the pharmaceutical industry where she has held a number of roles including project

management and leadership responsibilities in the Novartis Drug Discovery Incubator at the Novartis Institutes for Biomedical Research. Most recently she was responsible for business, financial, alliance and scientific program management across a number of programs at Alnylam Pharmaceuticals. These responsibilities included managing a flagship program which is partnered with Cubist Pharmaceuticals and Kyowa Hakko Kirin. Emily is currently Principal Consultant for Halloran Consulting Group helping clients across the life sciences develop and implement program and alliance management solutions.
