About WEST:

Launched in 2000, the WEST organization provides a forum for women in science and technology industries to network and share information about career advancement and skill development. Uniquely tied to this highly educated, influential community, the WEST leadership has long provided a supportive environment for mid-career women in these vital sectors, allowing them a unique opportunity to acquire the skills necessary to become business leaders in their fields. Our diverse membership represents industries ranging from information technology and biopharmaceuticals to cleantech and environmental sciences. WEST is a community and forum, for early, mid-career, executive, and entrepreneurial women in STEM careers. WEST members are committed to developing themselves as leaders through education, mentorship, networking, and information sharing. WEST encourages women to cultivate entrepreneurial thinking and creative risk-taking. <http://www.westorg.org/>
